WORKING PAPER

Target #: D001
Date: 5 Sept 90
Time: 1330-1420
Viewer: 052
Session: 01

METHOD USED:

I started by drawing a sketch of the area and dividing it into two sections. I then went back to my desk and started feeling for a "hot spot". I immediately felt the left side to be "warmer". I then tried to narrow it down and pinpoint the target. I marked the spot on my sketch. Then I went outside to the "starting tree". I closed my eyes, started counting, and went into focus 10. I turned in every direction to determine some type of pull or push in a certain direction. I did not feel any. I then told myself "The target is ~~eminating~~ ^{emanating} extreme heat", and I felt one area to be hot on my face when I turned toward it. I started walking in that direction. I found myself in the same vicinity as the mark I had placed on the paper, but I no longer felt the heat. I placed my outside marker as close to the mark I had made on the paper.
